

Student's name: _____

Nature

Read the following short text about nature and answer the questions:

The importance of nature

There are thousands of different kinds of plants on the Earth. They grow all over the world, including Colombia. We have beautiful and rich nature here! Some plants grow on the ground, some others on trees and rocks and some plants grow in the water. People and animals eat plants to stay alive. There would be no life on this Earth if there were no plants. Plants give off oxygen into the air. People and animals need oxygen to breathe.

Question time!

What part of the text mentions what it is in the image?

Family time!

With you family, have a conversation about the following questions. Create a message for everyone to reflect about!

1. Why is it important to take care of nature?
2. What happens in nature disappears?
3. What would be a life like without water?
